Please read each of the following questions very carefully. As you will see, many of these questions are personal. We understand this and will make every effort to protect the privacy of your answers.

It is very important that you answer every question honestly. In fact, it's better not to answer a question at all than to tell us something that is not accurate or true. Some questions may not seem to have an answer that is true for you. When this happens, you should simply choose the answer that is most right. Don't spend too much time on any one question. Remember, always ask for help if you're unsure about what to do. Thank you for your time and cooperation.
